***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-23, 48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoyt et al. in view of Manzi and Longfield.

Hoyt et al. disclose a method for automatically determining taxes for a contract for equipment, including the steps of establishing a set of contract characteristics (provided by central registry 306); establishing customer location information (inherent to the data inputted into the contract formation system). However, Hoyt et al. do not disclose automatically determining an appropriate set of tax rules to apply as a function of the customer location information; determining a contract type based on the contract characteristics under the set of tax rules; and, calculating a tax amount based on the contract characteristics, the contract type, and the set of tax rules.

Manzi does disclose determining an appropriate set of tax rules to apply as a function of the customer location information (col.3); determining a contract type based on the contract characteristics under the set of tax rules (col. 4 lines 20-38); and, calculating a tax amount based on the contract characteristics, the contract type, and the set of tax rules (Tax is paid, see abstract 2nd to last sentence).

It would be obvious to modify the method in Hoyt et al to include a lease based scheme as taught by Manzi in the automatic contract former of Hoyt et al the motivation for which is found in the streamlining of processes. It is noted that Hoyt et al. disclose in col. 33 a Quick Close contract which includes "negotiated terms that meet certain

Art Unit: 3627

business parameters" leading to the suggestion of the fully automated process of contract radification including an understanding of the tax effects of the contract. Thus, there is clear motivation to take what is alleged to be done manually in Manzi and implement it automatically as part of the certain business parameters of Hoyt et al. Official Notice is taken regarding the recited factors of location, contract characteristics and contract type as impacting on the contract tax effects, see e.g. *West's Advanced Taxation*.

However, the above combination appear silent regarding the feature of selecting a paying party from a group of paying parties to pay the tax amount as a function of the set of tax rules. However, Longfield discloses plural paying parties, namely an authorized preparer or an authorized financial institution 100 see col. 3 lines 41 et seq. and, depending upon a given set of rules which are established in advanced, selecting one to be the payor. It would be obvious to modify the aforesaid combination to include the teaching of Longfield to provide a selection between parties would are to pay on another's behalf based on predetermined rules, the motivation being that the person most responsible for the paying should be the one who should pay.

Manzi also answers as follows:

Re claims 2, 3, a contract is a lease.

Re claims 4,5, 6 and 7,12 tax authority would inherently include all taxing jurisdictions common to a given area. The tax base is a function of law not invention.

Re claims 8,9 the lessor is the paying party.

Re claims 10-13, 16 official notice is taken of the known use of installment paying, the use of invoices and zip codes.

Art Unit: 3627

Re claim 14. a product family and a model number for the equipment disclosed in col. 3 line 40.

Re claim 15 see col.4 lines 50 et seq.

Re claim 17: the system inherently records a residual amount due at end of contract.

Re claims 18-20 each equipment piece is given a book value which translates to a purchase price/option.

Re claim 21 inherent to any transaction is a mandatory final payment.

Re claim 22. An obvious expedient to the leasing of a vehicle is the trade option.

Re claim 48: Official notice is taken to power/size taxation rates. See, *West's Advanced Taxation* and mil rates for car taxes.

The motivation for combining Manzi to include these features in Hoyt et al. remains as stated above the motivation for which is found in the streamlining of processes.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
